1. Internship Card

Official Internship Card – Intern #156 | Domains: Artificial Intelligence & ML

I have posted my Internship Card on LinkedIn and tagged both @InquisitorsSociety and Muhammad Burhan (Chairman, Inquisitors Society).

2. Internship Joining Letter

INQUISITORS SOCIETY

INTERNSHIP JOINING LETTER

Letter No. IQ-1455

Date: July 09, 2026

Subject: Internship Joining Confirmation

Dear **Muhammad Amir Cheema**,

Congratulations! We are pleased to offer you an internship at **INQUISITORS Society**. Your internship will begin on **July 13, 2026** and end on **August 22, 2026** subject to satisfactory participation and adherence to society's policies.

During the internship, you will gain practical experience in Artificial Intelligence, Prompt Engineering, Research, Content Creation, Project Management, Leadership, and Professional Communication.

Expectations

You are expected to:

- Attend training sessions and meetings.
- Complete assigned tasks on time.
- Maintain professional conduct.

Upon successful completion of the internship, you will be eligible to receive an **Internship Completion Letter** and **Internship Certificate**.

We welcome you to **INQUISITORS Society** and wish you a successful and rewarding internship.

Sincerely,

Issued by:

Name: **Muhammad Burhan**

Designation: **Chairman, Inquisitors Society**

Internship Joining Letter (Letter No. IQ-1454) dated 09 July 2026 – Issued by Muhammad Burhan, Chairman

This letter has also been shared on my LinkedIn profile with tags to Inquisitors Society and Muhammad Burhan.

3. Professional Certificates Completed During Internship

During the internship I completed three important certifications. All certificates have been posted on my **LinkedIn** profile and tagged to **Inquisitors Society** and **Muhammad Burhan**.

3.1 Claude Code 101 – Anthropic

Certificate of Completion – Claude Code 101 (Anthropic)

3.2 AI Fluency: Framework & Foundations – Anthropic

Certificate of Completion – AI Fluency: Framework & Foundations (Anthropic) in partnership with UCC, Ringling College, HEA & Northeastern

3.3 Introduction to Generative AI – Google Cloud

Completion Badge – Introduction to Generative AI (Google Cloud)

All three certificates are publicly posted on LinkedIn with proper tags to the Society and the Chairman.

I created professional electronics website using AI tool (Lovable). It has been posted on my **LinkedIn** and tagged to **Inquisitors Society** and **Muhammad Burhan**.

4.1 Home Page

4.2 Shop

1.1 Brands

4.4 Deals

5 Final Project – Inquisitors Chatbot

Final Project Phase — My Responsibilities
For the final project phase, I was assigned to Group AI_07 (Inquisitors)

Society Chatbot Portal). My main responsibility was LLM, RAG, Ollama Integration, and AI Chatbot Implementation.

• **Responsibilities Completed**

- Implemented the **LLM-based chatbot** using **Ollama** with the **Qwen2.5:0.5B** model.
- Worked on the **RAG/Knowledge Base system** using the project's **knowledge.json** FAQ data.
- Implemented the **hybrid AI approach**, where the system first searches the local knowledge base and uses the LLM when a suitable answer is not found.
- Worked on the complete AI flow: **User Query** → **FAQ/Knowledge Base Search** → **LLM Fallback** → **Response**.
- Integrated and tested the communication between the **Backend, Knowledge Base, Ollama, and Qwen2.5 LLM**.
- Worked with the **/api/chat API** to process user queries and generate chatbot responses.
- Configured and tested the **Ollama local server** and **Qwen2.5 model**.
- Tested chatbot responses through **local API requests** and verified backend functionality.
- Troubleshot issues related to **Ollama, ports, API configuration, model execution, and backend integration**.
- Prepared technical documentation explaining **LLM, RAG, hybrid architecture, model integration, and AI data flow**.
- Contributed to the **final project presentation** by preparing and explaining the LLM and RAG implementation.

• **Key**

Ollama + Qwen2.5:0.5B

**Deliverables ○
LLM Integration**

- **RAG/Knowledge Base Integration**
- **Hybrid FAQ + LLM Chatbot Workflow**
- **Backend API and AI Response Testing**
- **LLM & RAG Architecture/Data Flow Documentation**
- **Technical Presentation Content**

Official Task 6 brief – API, Documentation & Final Testing requirements

6 Overall Summary & Reflection

My internship at **Inquisitors Society** (13 July – 22 August 2026) has been a transformative learning experience. As **Intern #121** (Intern Number 165) in the **AI, ML & Data Science** domain, I consistently delivered on every responsibility while expanding my skill set across multiple areas:

Technical Growth

- System architecture design and technical documentation for the Inquisitors Chatbot Portal (Group AI_07) — mapped the full Frontend ↔ Backend ↔ Knowledge Base ↔ AI Engine flow and the complete request-to-response data pipeline
- API documentation covering /api/chat, /api/chat/history/:sessionId, and /api/health — endpoints, request/response cycle
- Documented tech stack, knowledge base structure, security measures, deployment process, and error handling for a production-style Node.js/Express + Ollama/OpenAI chatbot
- Compiled and structured a testing/results summary (36 test cases, 100% pass rate) from the team's test report
- Built the UET Semester Tracker — a live website (GPA/CGPA calculators, semester tracking, summary dashboard) developed using the Lovable AI tool
- Authored the technical presentation content and generated the Gamma AI prompt to produce a branded, professionally designed slide deck for the chatbot project
- Delivered a final polished PowerPoint (.pptx) with enhanced headings, themed icon badges, and slide animations
- Completed industry certifications: **Claude Code 101** (Anthropic), **AI Fluency: Framework & Foundations** (Anthropic, in partnership with UCC, Ringling College, HEA & Northeastern), and **Introduction to Generative AI** (Google Cloud)
- Received and accepted the Internship Joining Letter (Letter No. IQ-1454, issued 09 July 2026 by Chairman Muhammad Burhan)
- Consistent LinkedIn documentation of every deliverable — internship card, joining letter, all three certificates, and the UET Semester Tracker — with proper tagging of @InquisitorsSociety and Muhammad Burhan (Chairman)
- All personal submission content clearly scoped to individually completed work (system architecture, technical documentation, and presentation), while final project evaluation is submitted jointly with Group AI_07
- GitHub repositories maintained publicly under github.com/Ayesha66122

I am grateful to the entire Inquisitors Society team, especially Chairman Muhammad Burhan, for the opportunity to learn, create, and grow. This internship has strengthened both my technical capabilities and my professional mindset. I look forward to applying these skills in future projects and continuing to contribute to the community of knowledge, curiosity, and excellence.
